the 1990s, the number of people in the world who are illiterate has increased from 500 million to 700 million.

There are many reasons for this. One is that the population of the world is growing so fast that the number of people who are illiterate is increasing. Another reason is that the quality of education is so poor that many people who are literate are unable to read and write. A third reason is that many people who are literate are unable to use their skills in a way that is useful to them. For example, many people who are literate are unable to read a newspaper or a book, or to write a letter or a document.

There are many ways to improve literacy. One way is to provide more schools and teachers. Another way is to improve the quality of education. A third way is to provide more opportunities for people to use their skills. For example, many people who are literate are unable to find a job or to start a business. If they could use their skills in a way that is useful to them, they would be able to improve their lives.

There are many organizations that are working to improve literacy. One of the most famous is the World Literacy Foundation. This organization has been working since 1961 to help people who are illiterate. It has provided millions of people with the skills they need to read and write. It has also provided people with the skills they need to find a job or to start a business.

There are many other organizations that are working to improve literacy. For example, the United Nations has a program called the World Literacy Campaign. This program has been working since 1966 to help people who are illiterate. It has provided millions of people with the skills they need to read and write. It has also provided people with the skills they need to find a job or to start a business.

There are many more organizations that are working to improve literacy. For example, the International Literacy Association has been working since 1964 to help people who are illiterate. It has provided millions of people with the skills they need to read and write. It has also provided people with the skills they need to find a job or to start a business.

There are many more organizations that are working to improve literacy. For example, the National Literacy Campaign has been working since 1977 to help people who are illiterate. It has provided millions of people with the skills they need to read and write. It has also provided people with the skills they need to find a job or to start a business.

There are many more organizations that are working to improve literacy. For example, the World Council for Educational Communication has been working since 1961 to help people who are illiterate. It has provided millions of people with the skills they need to read and write. It has also provided people with the skills they need to find a job or to start a business.
